STATEMENT OF OBJECTS AND REASONS

Education is a key element for developing human resources and contributing to the growth of the society. From a relatively small beginning, the Indian Information Technology (IT) industry has emerged as a strong and credible force and is now recognised as a major constituent of the global IT services industry. In order to develop manpower for different areas of knowledge economy, education and training in Information Technology is a prerequisite.

2. A major objective in establishing Indian Institutes of Information Technology (IIITs) is also to set up a model of education which can produce best-in-class human resources in IT and harnessing the multi-dimensional facets of IT in various domains. These are conceived as research-led institutions contributing significantly to the global competitiveness of key sectors of the Indian economy and industry with application of IT in selected domain areas. While the number of students produced by these IIITs may be small, the impact they are likely to create will be substantial.

3. The Bill seeks to provide the four existing IIITs funded by the Central Government independent statutory status with uniform governance structure and policy framework as also to declare them as Institutions of national importance and to enable them to grant degrees to their students in the academic courses conducted by these Institutes.

4. The Bill seeks to achieve the above objectives.
