STATEMENT OF OBJECTS AND REASONS

Allied and healthcare professions include a wide-range of health professionals for the diagnosis, evaluation and treatment of acute and chronic diseases. The Allied and healthcare professions also work to optimize patient outcomes and attend to overall prevention, promotion, wellness and management of diseases.

2. The health workforce in the Indian scenario has been defined with focus mainly on few cadres such as doctors, nurses and frontline workers. Many other professionals belonging to more than fifty allied and health care professions continue to remain under-utilised and unregulated in the health system. These broadly include professional categories such as Physiotherapy, Occupational Therapy, Ophthalmic Sciences, Nutrition Sciences, Medical Laboratory and Life Sciences, Medical Radiology, Imaging and Therapeutic Technology, Medical Technologists and Physician Associates, Trauma, Burn Care and Surgical / Anesthesia related Technology, Community Care and Behavioral Health Sciences and Health Information Management and Health Informatics. There has been a persistent demand for a regulatory framework for such professions for several decades.

3. The 'para-medical professionals' as well as other technologists and therapists have finally been accorded their due recognition and are being presently being termed as 'Allied and Healthcare Professionals'. Based on the International Labour Organisation's International Standard Classification of Occupations (ISCO-08), a detailed mapping has been undertaken to identify such professions.

4. The United Nation's Commission on Health Employment and Economic Growth with a focus on building resilient health systems stresses upon strengthening the health workers and urges to ensure effective health employment. As estimated by the World Health Organisation, by the year 2030, the global economy is projected to create around forty million new health sector jobs, mostly in the middle and high-income countries. Despite the anticipated growth in jobs, there shall be projected shortage of eighteen million health workers to achieve the sustainable development goals in low and lower middle-income countries.

5. With the advancement in the health sector, changing preferences of consumers and service providers, it is now warranted to create a fresh vision of healthcare delivery with a patient-centric approach and focus on moving to a multi-disciplinary team-based care. This has necessitated the need to implement new ways of deploying health workers, strengthening the workforce by task-shifting models and improving access to quality services through qualified and competent allied and healthcare professionals.

6. Accordingly, the Allied and Healthcare Professions Bill, 2018 was introduced in Rajya Sabha on the 31st December 2018 and the same was referred to the Department Related Parliamentary Standing Committee of the Ministry of Health and Family Welfare for its examination and Report. The Committee after detailed examination recommended certain amendments to the said Bill. Therefore, it has been decided to withdraw the pending Bill and to introduce a new Bill, namely, the National Commission for Allied and Healthcare Professions Bill, 2020, incorporating the recommendations made by the Committee.

7. The Bill, *inter alia*, provides for,—

(a) constitution of a National Commission for Allied and Healthcare Professions for regulation and maintenance of standards of education and services, assessment of institutions, maintenance of a Central Register and State Register of such professionals;

(b) constitution of Professional Councils for every recognised professional category to frame policies and standards for the governance of allied and healthcare related education and professional services and to regulate their professional conduct;

(l) measures to ensure compliance by the State Councils;

(m) constitution of committees by engaging independent experts for technical advice related to any of the professions;
